

## CASE STUDY

# Travel – Corporate Spend Analytics

**Client:**

Fast growing corporate travel management company with over 400 customers across Australia.

**Problem:**

They need to provide each of their customers with monthly and quarterly analytics related to their travel spend (air, hotel, cars and fees).

**Solution:**

Automated solution that collects data from core systems and allows account managers to produce a dashboard for their customers in minutes.

**Before:**

- High volume of clients meant that manually creating reports was not possible.
- Difficult to customise standard reporting out of core systems.
- Unable to ensure consistency in reports from month-to-month.

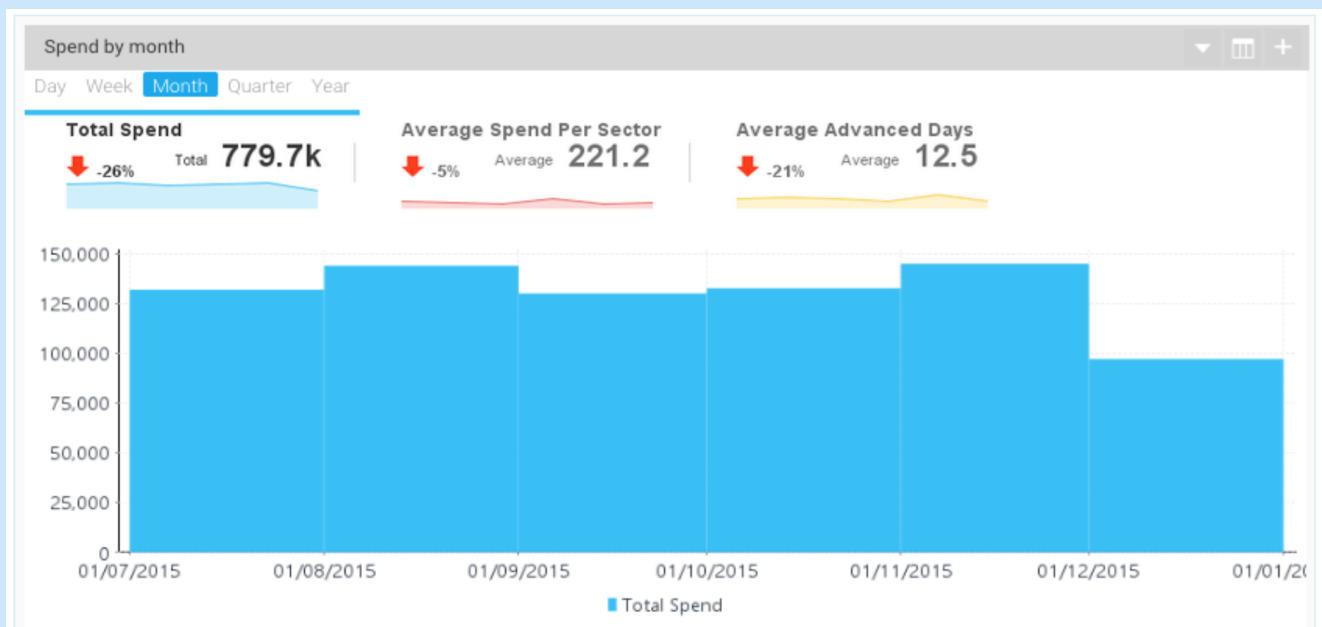

**After:**

- Reporting available for all customers on demand. Each customer can be created in a few minutes.
- Highly customised dashboards that differentiate the travel agency from their competitors.
- Consistent end-to-end production of reports each month.

# SAMPLE OUTPUT

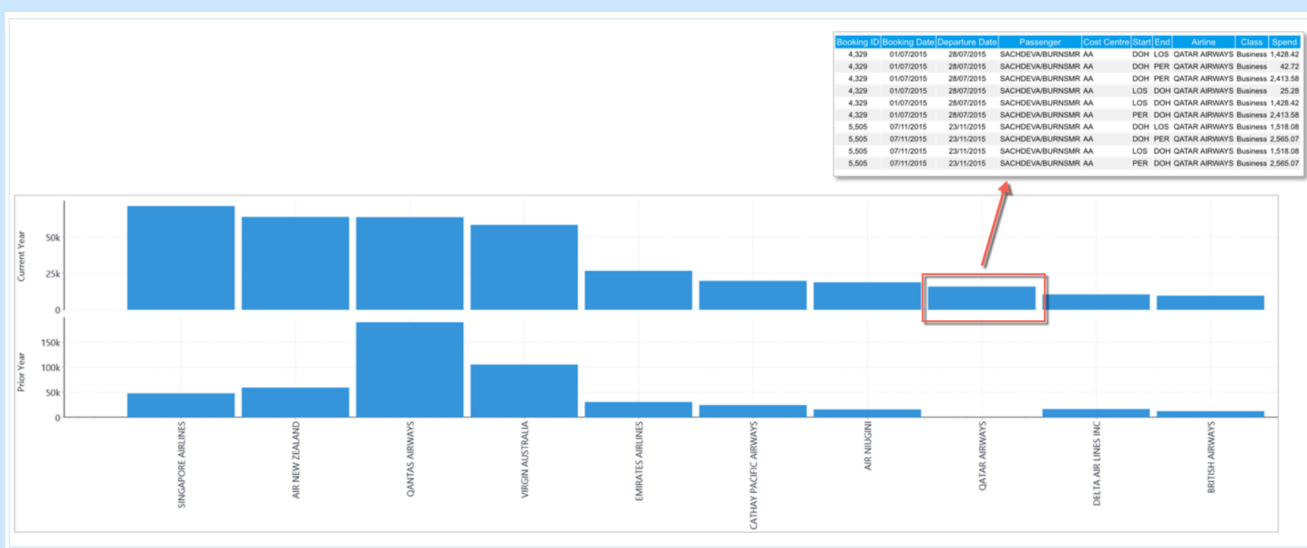

Heat grid of airlines and city pairs flown.

Key metrics month by month – such as travel spend and the number of days in advanced that bookings are made.

Number of sectors (flights) taken categorised by how far in advance the flight was booked (in days).

Top 10 airlines YoY, with the ability to drill-down to the individual bookings.

## KEY METRICS

**DATA COLLECTED  
AND PROCESSED  
DAILY.**

**REPORTING FOR  
OVER 400  
CUSTOMERS.**

**ANALYTICS  
BASED ON  
850,000  
BOOKINGS.**

**100+ STEPS  
AUTOMATED.**

**CLIENT  
DASHBOARD  
GENERATED IN  
UNDER 10  
MINUTES (ON  
DEMAND).**

## ABOUT SOLVEXIA

SolveXia is an automation, data management and analytics platform used by banks, general and life insurers and other companies. The tool is particularly well suited to complex and specialised processes that are repetitive and would otherwise rely on spreadsheets, Access databases or macros. Users automate processes by configuring a series of drag-and-drop “robots” capable of collecting, validating, transforming and calculating data.

SolveXia executes processes faster (at least 10x), produces more credible and consistent information and enforces transparency and audit controls. By doing so, organisations are more easily able to achieve strategic objectives in areas such as compliance, customer/partner engagement and risk-mitigation.
