RE: M23-1034 External Penetration Test

To Whom It May Concern:

Mercury Information Security Services Pty Ltd (Mercury) has conducted a number of cyber security assurance activities against SolveXia. Our activities focused on the organisation's external perimeter which Mercury undertook a penetration test during October 2023. This service has been accredited under the CREST Scheme.

The assessment identified several issues requiring remediation. No critical security issues have been identified.

Should you have any questions or seek amplifying details, my contact details are below.
